Diogo Fernandes

Software Engineer

About me Software Engineer, that has been working as a CloudOps Engineer for the past year. I'm interested in the CI/CD process, also a fan of immutable infrastructure and infrastructure as code. I'm looking for challenges that allow me to keep working on infrastructure but to write code at the same time.

Experience

Mercedes-Benz.io Dec. 2022 - present, Lisbon Portugal (Remote)

CloudOps Engineer, part of the Cross-Functions Team on the After-Sales unit.

Talkdesk Set. 2019 - Nov. 2022, Coimbra Portugal (Remote)

Currently, I'm working in one of the R&D clusters at TDX. Here, I'm learning about best practices with IAC, immutable infrastructure, and the CI/CD process. Working closely with the development teams, and also making sure that our infrastructure interfaces well with the rest of the company's.

Ubiwhere Jul. 2019. - Set 2019, Coimbra Portugal

Summer internship. Got to understand a bit more about ETL, python and docker.

Lifeguard Jun. 2016 - Set. 2019

Worked in public pools and in a water park during my summer breaks throughout my bachelor's degree.

Sonae Nov. 2015 - Apr. 2016, Pombal Portugal

I worked as a baker after I quit my pilotage course in 2015. During this time I got more interested in Linux and the C programming language.

Education

2016 - 2019, Universidade de Coimbra

Bcs. Informatics Engineering 15/20

2016 - 2016, Instituto Superior de Ciências da Informação e da Administração

Lifeguard course.

2015 - 2015, Escola Superior Náutica Infante D. Henrique

Bcs. Deck and Bridge Operations.

Tech Stack

Daily use

- Git
- Docker
- Ansible
- Terraform
- Python
- AWS
- Linux

Other technologies

- Jaeger
- Drone tracing
- CI
- Elasticsearch
- Relic
- RabbitMQ
- Nomad
- Consul
